

BILAL

MERN-Stack Developer

Karachi, Pakistan | +92 370 2675457 | bilalali.office.pk@gmail.com | Portfolio | GitHub | LinkedIn

PROFILE SUMMARY

Software Development Trainee: Professional Software Development Course – Jawan Pakistan I am currently pursuing a Professional Software Development course at Jawan Pakistan, where I have gained hands-on experience in HTML, CSS, JavaScript, React, Tailwind CSS, Next.js, and TypeScript. Since starting my web development journey in 2024, I have built a strong foundation in modern frontend development through consistent learning and practical projects. During my training, I completed projects including a Student Management System, Contact Book Application, and multiple responsive web applications. These projects strengthened my understanding of component-based architecture, state management, routing, and responsive design. I also have experience with Git and GitHub for version control and focus on writing clean, maintainable code. In addition, I create AI-generated content and manage a YouTube channel with 78.5K+ subscribers. I also work with AI-powered image enhancement, professional portraits, and customized visual editing.

TECH STACK

Languages: HTML5, CSS3, JavaScript, TypeScript

Frameworks: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, MongoDB

Tools: Git, GitHub, Responsive Design, Vercel
